
Formal Techniques Real Time Fault Tolerant

formal techniques for verification of complex real-time systems - provide formal techniques that apply in particular to the early stages of the design trajectory of complex concurrent real-time systems. this thesis contributes a number of formal techniques that can be effectively used to study the behaviour and in particular the correct operation of distributed real-time systems. **formal techniques for verification of complex real-time ...** - provide formal techniques that apply in particular to the early stages of the design trajectory of complex concurrent real-time systems. this thesis contributes a number of formal techniques that can be effectively used to study the behaviour and in particular the correct operation of distributed real-time systems. **real-time schedulability analysis with formal techniques** - formal techniques youcheng sun scuola superiore sant'anna, pisa. ... 8 new techniques for g-edf schedulability analysis 81 ... particular, real-time scheduling deals with deterministically distributing time to (real-time) tasks subject to temporal constraints. in the context of real-time scheduling, the time typically refers to the processing **formal methods in software engineering lecture 17** - formal modeling methods ... good for reactive systems (e.g. real-time, embedded control systems) can reason about safety, liveness, performance(?) ... first major attempt to use knowledge representation techniques in re object oriented language, with classes for activities, entities and assertions ... **an adl centric approach for the formal design of real-time ...** - some formal modelling and verification techniques and providing those corresponding tools. it emphasizes on the adl of react (clara), and the validation of functional architectures using formal techniques. keywords: adl, real-time systems, architecture design process, formal validation 1. introduction **integrating structured oo approaches with formal ...** - integrating structured oo approaches with formal techniques for the development of real-time systems z. chen, a. cau, h. zedan¹ and h. yang software technology research laboratory, **proceedings of the 3rd international symposium formal ...** - formal techniques in real time and fault tolerant systems l"ubeck, germany, 19-23 september 1994 activation-oriented specification of real-time systems v. ered gafni amiram yeh udai yishai a. f ... **supporting uml-based development of embedded systems by ...** - are translated, via xmi, to the input format of formal tools, to allow timed and non-timed model checking and interactive theorem proving moreover, the play-engine communicated by dr. susanne graf. this work has been supported by eu-project ist 33522 - omega "correct development of real-time embedded systems in uml". for more information, see **applying formal methods to modeling and analysis of real ...** - analysis of real-time data streams krasimira kapitanova university of virginia, charlottesville, va, usa, kراسi@virginia ... applying formal methods to modeling and analysis of real-time data streams 85 ... techniques to alleviate the uneven workloads in distributed environments tu et al. **survey of formal specification techniques for reactive systems** - many systems including systems with real-time constraints and multiple concurrently executing processes. this report develops a set of evaluation cri- ... state of the industry in using formal techniques both in terms of the techniques being used and the tools used to support the formalisms. it helps us to understand **formal analysis for real-time scheduling** - formal analysis for real-time scheduling ... analysis techniques, the theory of real-time ... a formal analysis methodology for real-time scheduling the literature on real-time scheduling contains many results that should provide sound bases for the engineering of real-time systems. for such
