the algebraization of kazhdan's property (t) - icm2006 - the algebraization of kazhdan's property (t) yehuda shalom* abstract. we present the surge of activity since 2005, around what we call the algebraic (as contrasted with the geometric) approach to kazhdan's property (t) the discussion includes also an announcement of a recent result (march 2006) regarding property (t) for linear groups over **a note on property (t) - homepagesth.uic** - 2 isaac goldbring references [1] b. bekka, p. de la harpe, a. valette, kazhdan's property (t), new mathematical monographs (11), cambridge university press, 2008. **arxiv:1902.04370v1 [math] 12 feb 2019** - $\text{aut}(G\Gamma)$ has kazhdan's property (t) if and only if Γ is a complete graph. property (t) for $\text{aut}(G\Gamma)$ property (t) was defined by kazhdan for locally compact groups in terms of unitary representations. this property was reformulated in many different mathematical areas, in particular in geometric group theory. **on property (t) for automorphism groups of graph** -) has kazhdan's property (t) if and only if is a complete graph. property (t) for $\text{aut}(G)$ property (t) was defined by kazhdan for locally compact groups in terms of unitary representations. this property was reformulated in many different mathematical areas, in particular in geometric group theory. it was proven by delorme and guichardet that a **new mathematics titles - american mathematical society** - new mathematics titles from cambridge university press!
